Tejas Jay

Analytics Engineer at Cogeco | Ex - Amazon
Canada

Summary

Data-driven problem solver with a strong background in
implementing and delivering data driven solutions and over six years
of experience working with various technology stack. My journey
in the world of data began as a Risk Analyst at Amazon, where I
handled vast datasets and derived actionable insights, sparking my
passion for data-driven decision-making.

At PwC, I delved into the fascinating realm of Artificial Intelligence,
successfully resolving issues related to financial crime and
transaction data analysis. My dedication to continuous learning led
me to pursue a postgraduate diploma in Data Analytics for Business
at St Clair College, Ontario.

During my academic pursuits, I engaged in enriching internships,
such as at iNeuron.ai, where I collaborated on innovative solutions
using AI and SSD algorithms to prevent hazardous accidents in real-
time.

As an Analytics Engineer at Essex Powerline Corporation, I
developed a project optimization tool employing principles of Efficient
Frontier and Hierarchical Risk Parity. These accomplishments paved
the way for my current role as an Analytics Engineer at Cogeco,
where I excel in automating tools and processes, reducing costs, and
enhancing performance appraisals.

Experience

Cogeco Inc.
Analytics Engineer - Automation tools and processes
June 2022 - Present (3 years)
Ontario, Canada

Essex Powerlines Corporation

AI Analytics Engineer
January 2022 - May 2022 (5 months)
